

PP BUBBLE

PRODUCT DESCRIPTION

Protective Packaging

- Shish PP Bubble roll is manufactured using a layer of PP sheet laminated with regularly spaced, protruding air filled bubbles.
- Its unique cushioning properties makes it ideal for protective packaging for OEM and materials due to its scratch protection properties.
- The properties of PP of being, lightweight, high resistance to cracking, acids, organic solvents, electrolytes, etc. makes it perfect for steel coil packing.

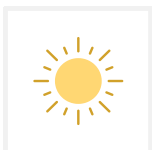

FEATURES & BENEFITS

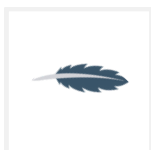

Strong & Durable

Waterproof

UV Stabilized

Light-weight

Multilayered & Cross Laminated

100% Recyclable, an Eco Friendly film

Specifications

Thickness	2.5 mm - 4 mm
Tensile Strength	30 lb
GSM	300 - 650

***We can customize the size and GSM to your specifications.**
